Vesta

Design by:
SIGFRIDO BILBAO

The simplicity and the lines developed for this series of VESTA cabinets take us to another level. The quality of its raw materials together with its design allows any space, whether it is a hotel, a shop, a restaurant, an office or even our home, to take all the attention above any other decorative and functional element. It fits in vintage environments as well as in spaces with industrial aesthetics. It contains a wide range of neutral and very colourful finishes so that VESTA provides the character and prestige that your environment needs. The interior of each set can be configured according to the user's requirements, giving it a wide range of variants. It is the perfect piece of a puzzle that every furnishing project has to fit in order to be successful.

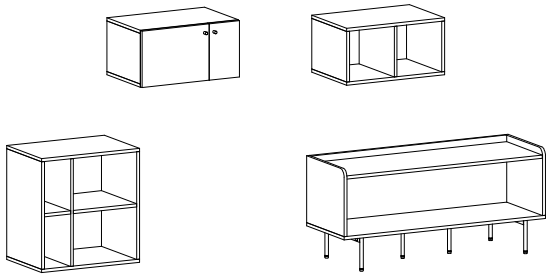
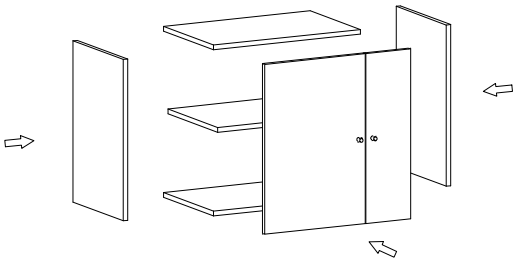
DESIGN
FOR DIVERSITY

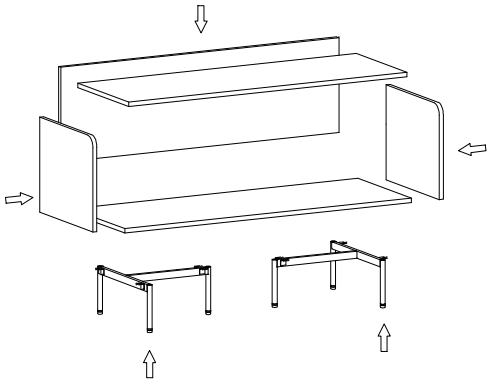
0 Selects and sorts all the VESTA material to assemble the corresponding container set.



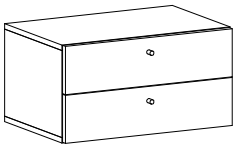
1 Assemble the different cupboard or shelf modules according to your selected exploded view.



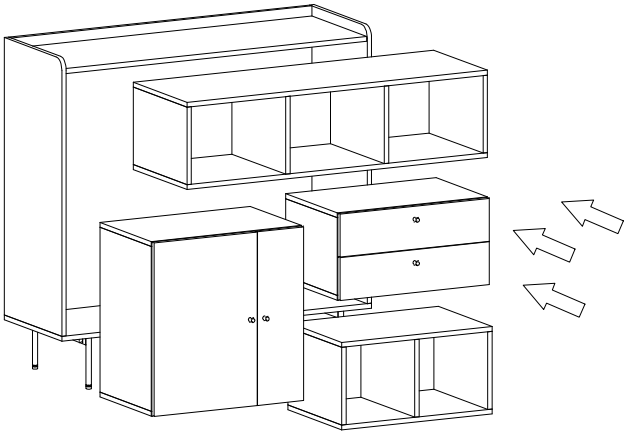
2 Assemble the defined container and attach the corresponding legs.



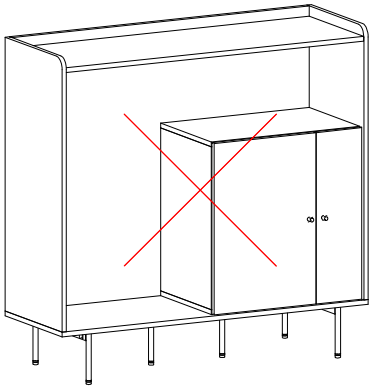
3 Module two drawers is the only one to be supplied assembled.



4 Insert the modules into the container according to the defined layout.



5 **ATTENTION. There must not be any empty space inside the container.**



6 Same procedure in case of using any other VESTA distribution.
